Principles of consolidation

Consolidated financial report covers the report of the dominant entity - Stalexport S.A. and the reports of the subsidiary companies controlled by the dominant entity. Control is understood as the possibility to manage the operating and financial policy of the entity by the dominant entity in order to achieve economic benefits.

Subsidiary entities

Subsidiary companies purchased in the financial year are covered by the consolidated financial report as from the date they are controlled by the dominant company. On the date of purchasing the subsidiary entity (getting the control), the assets, liabilities and contingent liabilities of the subsidiary company are evaluated at fair value. The surplus of purchasing price over the fair value of the acquired net assets is the goodwill. The surplus of the taken over net assets stated in fair values, is shown in profit and loss account of the financial year, in which the purchase occurred.

The shares of the minority shareholders are shown according to fair value of net assets falling to them.

All the financial operations between entities of the Capital Group are excluded from the consolidated financial report. All profits and losses regarding economic operation in progress on the date of drawing up the consolidated financial report are also subject to elimination. A part of equity capital of the capital group of Stalexport S.A. falling to minority capital is shown in separate item of equity capital.

Associated entities

Associated entities are the ones on which the group has considerable impact, understood as the impact on decisions taken in operating and financial policies.

Shares in associated entities are shown in financial report according to evaluation via ownership right method, excluding the situation when these shares are classified as available for sale.

The purchase price of share in associated entity is subject to any adjustments by changes in fair value of net assets, falling to value of possessed share since its purchase to the date of the financial report and results of the stated loss of value.

All profits and losses on transactions carried out between entities in the group and the associated companies, are subject to exclusions to the level of held share.

Long-term assets

Tangible fixed assets

The fixed assets comprise the assets components according to the net purchase prices (without VAT tax) the period of use of which exceeds 1 year; and the right of perpetual usufruct of land, the co-operative ownership right to an apartment, the land in perpetual usufruct.

Tangible fixed assets are amortised by straight line method in the period of economic use. Fixed assets are amortised the moment they are accepted for usage.

Land is not amortised. The costs of overhaul and modernisation not increasing the opening use value of given component of fixed assets, debit the costs of period in which they were borne.

Fixed assets, which are the subject of financial leasing, are shown in the balance sheet on a par with other components of fixed assets and they are subject to amortisation according to the same principles.

Intangible assets

Intangible fixed assets acquired from the economic entity within the separate transaction are evaluated according to the purchase price. Intangible assets purchased within the transaction of taking over the economic entity are shown in assets separately from the goodwill, if at initial disclosing their fair value can be reliably determined.

Intangible assets with determined period of use are subject to amortisation via straight line method in the period of their economic use.

Goodwill of the subordinated entities

Goodwill shown as the component of assets on the date of its purchase, constitutes the surplus of purchase price over the fair value of the acquired assets, liabilities and contingent liabilities of the subsidiary, associated or correlated entity. This value is subject to yearly tests for loss of value. Loss of value stated during the conducted tests is momentarily shown in profit and loss account and it is not subject to subsequent correction.

Long-term receivables

Long-term receivables are evaluated in the amounts due for payment, considering the principles of careful evaluation, thus decreased by the updating write offs.

Long-term investments

The components of long-term financial assets are evaluated at purchase prices considering the adjustment for permanent loss of value.

The real estates investments are maintained so as to achieve the incomes from lease or accrual of their value, they are evaluated on the date of their purchase according to purchase price (manufacturing cost), on the balance sheet date according to their fair value. Revenues and costs connected with achieving the fair value by them, are assigned to profit and loss account in the period they originated.

Assets available for sale

Assets available for sale is the group of assets for which the Company's management has been looking for purchasers and it is probable that the assets will be sold within one year or they are immediately available for sale.

Assets by virtue of deferred income tax

The balance sheet value of the component of assets by virtue of deferred income tax is verified on each balance sheet date and it is subject to write-off in case when there is doubt of taking economic advantage by the Group, connected with using the tax assets.

Short-term assets

Inventories

Inventories of materials and goods are evaluated as on the balance sheet date according to the purchase price. Finished products and work in progress are evaluated according to the technical manufacturing cost (determined as the direct costs and price spread of indirect costs determined upon assumption of usual use of production capacity). The technical manufacturing costs does not comprise the evaluated costs of external financing.

The method FIFO "first in, first out" was accepted as the method of disposal of inventories.

If the purchase price or the technical manufacturing cost is higher than anticipated sale price, the Company establishes updating write offs which correct own sale cost.

Moreover the Company establishes updating write offs for inventories which do not show rotation over 360 days.

Short-term receivables

Short-term receivables are shown in value due for payment considering careful evaluation, i.e. diminished by the updating write-offs which result from carried out analysis of these receivables and from decisions made by the Management Boards of the Companies.

The amounts of established write-offs updating the receivables are assigned to other costs of activity.

Short-term investments

Cash and its equivalent

Cash comprises cash at bank and on hand. They are shown according to nominal value, and in foreign currencies calculated according to binding average rate of National Bank of Poland as on 29.09.2006.
